

# Psychology BS in Healthcare

Interested in psychology but want to pursue a career in a health related field?

DePaul University is the first in the region to offer a Bachelor of Science degree in Psychology with the opportunity to fulfill requirements for a variety of health-related degree programs including Pre-Med.

- **Flexible.** Fulfills basic course requirements for a variety of health-related careers and preparing for the MCATs.
- Students can **begin in the 1<sup>st</sup> or 2<sup>nd</sup> year** and finish in 4 years.
- For those interested in a career in clinical psychology this serves as first step in obtaining a certificate in **Clinical Psychopharmacology**: a license to prescribe basic psychopharmacological treatments.
- Students in this major are part of DePaul's **Pre-Health/Pre-Med Advising program** to ensure success.
