

Bloodborne Pathogen Training for Externship Student within the DePaul University School of Nursing

In the event of an exposure while on campus at DePaul University, externship students must follow the guidelines set forth for any "student" in the Bloodborne Pathogens Exposure Control Plan (Section 11.2). Externship students are also encouraged to be familiar with the bloodborne pathogens exposure plan of their home institution, as there may exist additional requirements.

Externship students must familiarize themselves with the Bloodborne Pathogens Exposure Control Plan and review a training PowerPoint slide deck. After reviewing this information, externship students must document proof of their training by taking a short, 10-question quiz and submitting the results of the quiz (final submission page that shows score) to nursing@depaul.edu.

A quicklink, go.depaul.edu/bbp, will direct students to the DePaul University School of Nursing website, where the following documents can be found:

- Bloodborne Pathogens Exposure Control Plan
- Training PowerPoint
- Training Quiz

Full Page Link: <http://csh.depaul.edu/academics/nursing/student-resources/Pages/exposure-control-plan.aspx>

Please note that DePaul University requires all students to submit annual proof of training, which resets on January 1 of each calendar year, or earlier if standards are revised.
